(54) Title: NOVEL LIPASES AND USES THEREOF

(57) Abstract: The invention relates to a newly identified polynucleotide sequence comprising a gene that encodes a novel lipolytic enzyme from Aspergillus niger. The invention features the full length nucleotide sequence of the novel gene, the cDNA sequence comprising the full length coding sequence of the novel lipolytic enzyme as well as the amino acid sequence of the full-length functional protein and functional equivalents thereof. The invention also relates to methods of using these enzymes in industrial processes and methods of diagnosing fungal infections. Also included in the invention are cells transformed with a polynucleotide according to the invention and cells wherein a lipolytic enzyme according to the invention is genetically modified to enhance its activity and/or level of expression.

Form PCT/ISA/210 (continuation of second sheet) (January 2004)

Box i	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)				
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:					
1.	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:				
2.	Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful international Search can be carried out, specifically:				
з. [Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).				
Box II	Observations where unity of Invention is lacking (Continuation of item 2 of first sheet)				
This inte	ernational Searching Authority found multiple inventions in this international application, as follows:				
	see additional sheet				
1.	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.				
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.				
з. 🗀	As only some of the required additional search fees were timely paid by the applicant, this international Search Report covers only those claims for which fees were paid, specifically claims Nos.:				
4. X	No required additional search fees were timely paid by the applicant. Consequently, this international Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-24 (all partially)				
Remark	The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.				

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-24 (all partially)

NBE028 polypeptide (SEQ ID NO:3) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID NO:1 and 2), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE028 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

2. claims: 1-24 (all partially)

NBE029 polypeptide (SEQ ID NO:6) encoding a lipolytic enzyme and corresponding polynucleotides. (SEQ ID NO:4 and 5), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE029 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

3. claims: 1-24 (all partially)

NBE030 polypeptide (SEQ ID N0:9) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID N0:7 and 8), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE030 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

4. claims: 1-24 (all partially)

NBE031 polypeptide (SEQ ID N0:12) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID N0:10 and 11), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE031 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

5. claims: 1-24 (all partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

NBE032 polypeptide (SEQ ID NO:15) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID NO:13 and 14), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE032 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

6. claims: 1-24 (all partially)

NBE033 polypeptide (SEQ ID NO:18) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID NO:16 and 17), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE033 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

7. claims: 1-24 (all partially)

NBE034 polypeptide (SEQ ID NO:21) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID NO:19 and 20), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE034 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

8. claims: 1-24 (all partially)

NBE036 polypeptide (SEQ ID NO:24) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID NO:22 and 23), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE036 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

9. claims: 1-24 (all partially)

NBE038 polypeptide (SEQ ID NO:27) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID NO:25 and 26), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE038 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

10. claims: 1-24 (all partially)

NBE039 polypeptide (SEQ ID NO:30) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID NO:28 and 29), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE039 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

11. claims: 1-24 (all partially)

NBE043 polypeptide (SEQ ID NO:33) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID NO:31 and 32), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE043 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

12. claims: 1-24 (all partially)

NBE045 polypeptide (SEQ ID NO:36) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID NO:34 and 35), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE045 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.

13. claims: 1-24 (all partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

NBE042 polypeptide (SEQ ID NO:39) encoding a lipolytic enzyme and corresponding polynucleotides (SEQ ID NO:37 and 38), vectors comprising said polynucleotides, recombinant host cells comprising said vectors or polynucleotides, antibodies directed against said NBE042 polypeptide, fusion proteins comprising said polypeptide and use of the polypeptide in the preparation of a dought or a baked product.
